

BUILDING A BETTER
BEND

Integration, Revitalization and Transportation: *Opportunities for a Small City Campus*

Free Lecture on Tuesday, October 23rd at 7:00 PM
Bend Parks and Recreation Building, 799 SW Columbia Street, Bend

David C. Bagnoli, AIA, LEED AP, an expert on smart growth at colleges and universities, will speak October 23 at the Building a Better Bend Speaker Series. An architect and urban designer who has written extensively on the benefits of balanced town-gown relationships, Mr. Bagnoli will discuss ways that educational institutions can physically integrate campus buildings into surrounding neighborhoods while minimizing traffic and other impacts. He will address the physical, economic, and transportation challenges and opportunities created by colleges in small cities and describe how such institutions have engaged their surroundings to various degrees. Real-world examples will include:

- Campuses which fully integrate into a community’s traditional streetscape and historic structures;
- Campuses which partially engage a community at one edge, with a visible, positive, and often defining presence and;
- Campuses that remains separate both physically and ideologically from its respective community.

The benefits of each can include downtown revitalization, neighborhood enhancement, and sensible solutions for transportation issues, including bicycle/pedestrian access and public transit. The presentation will conclude with a conversation about potential approaches for Bend as it considers its unique opportunity of integrating OSU into a historic area.

Presenter: David C. Bagnoli, AIA, LEED AP, BD+C, McGraw Bagnoli Architects

David C. Bagnoli has more than twenty years experience in Architecture and Urban Design, including commercial mixed-use, multi-family housing, performing arts, academic and hospitality architecture. He is a graduate of the University of Pennsylvania and the University of Notre Dame and serves as visiting critic and guest lecturer at the University of Pennsylvania, Virginia Polytechnic and University of Maryland. He has recently participated in the development of “Smart Growth at Colleges and Universities, A Primer” for the U.S. Environmental Protection Agency and has spoken on this topic at the National Building Museum, the National Smart Growth Conference and the National Smart and Sustainable Campuses Conference. Mr. Bagnoli’s projects have received numerous design awards at the highest level, including a national Honor Award and two national Housing Awards from the American Institute of Architects (AIA), two national Charter Awards from the Congress for the New Urbanism, and awards from regional and state AIA chapters including the Maryland, New York, the Boston Society of Architects, Washington DC, and the Virginia Society of Architects.

About Us

Building a Better Bend, Inc. is a non-profit organization that is committed to presenting a lecture series to the Central Oregon community focused on “Smart Growth Principles” and how to apply lessons learned around the country to our community.
